

**EDUCATIONAL PHILOSOPHY AND GOALS**

It is the philosophy of the District and the Board, that the District exists for students regardless of race, color, national origin, sex, religion, or disability. Through teaching and counseling, the District should concentrate on providing equal and adequate opportunities for each student to develop physically, intellectually, socially, and vocationally in order that students may contribute to society, be capable of enjoying a cultural, moral, and spiritual life, and recognize and accept responsibility in preserving the democracy that has provided these opportunities.
